

Instructions for use - Please read carefully!

Wasa®-Soft

Skin washing lotion
For sensitive or severely strained skin

Composition

Ingredients: Aqua, Sodium Laureth Sulfate, Sodium Chloride, Alcohol Denat., Disodium Cocoamphodiacetate, PEG-200 Glyceryl Hydrogenated Palmitate, PEG-7 Glyceryl Cocoate, Parfum, Sorbic Acid, Citric Acid, Dibutyl Adipate, CI 42090, CI 47005

Properties

- Wasa®-Soft cleans the skin thoroughly and gently, even when it is very dirty
- Very well tolerated by the skin, even by use of alcoholic hand disinfectants
- Well tolerated by sensitive skin
- Preserves the natural protective hydrolipid film of the skin
- Forms a mild foam, has a pleasant fragrance
- Does not leave any residue in the bath tub
- Non-alkaline
- Neutral pH

Range of application

- Wasa®-Soft is particularly appropriate for regular use and especially recommended for frequent use / for professional reasons because of its extremely mild action on the skin
- For use before surgery and after hygienic hand disinfection
- For washings and showering
- For the hygiene of the body in general
- In case of extreme sensitiveness to alkaline soaps

Mode of application / dosage

Wet hands and/or skin, then wash with Wasa®-Soft, rinse well and dry.
For washings and foam baths use a larger amount of Wasa®-Soft.
